Glossary of Terms

ADP	Assistive Devices Program
FM	frequency modulation
FTE	full-time equivalent
IEP	Individual Education Plan
IPRC	Identification, Placement, and Review Committee
ISA	Intensive Support Amount
OEN	Ontario Education Number
OSR	Ontario Student Record
PAAC on SEAC	Provincial Parent Association Advisory Committee on Special Education Advisory Committees
PSIE program	Personalized, Special Instructional Equipment program
SEAC	Special Education Advisory Committee
SEPPA	Special Education Per Pupil Amount
SIP	Special Incidence Portion

Special Education Funding

Overview

The government is committed to funding school boards so that each student in Ontario has access to a high-quality education regardless of the student's background or where the student lives. Student-focused funding ensures that the government meets that commitment.

Funding for services and supports for students with special needs is provided through several grants that are part of student-focused funding. The Foundation Grant provides for costs associated with the basic requirements of all students, including those with special needs. The Special Education Grant provides funding to meet the incremental costs of special education programs and supports (that is, the costs above the basic costs of education associated with all students). In addition, boards also use funding from other special purpose grants – grants such as the Transportation Grant and the Teacher Compensation Grant – to help meet needs of students with special needs.

The Special Education Grant comprises two components:

- the Special Education Per Pupil Amount (SEPPA), which is a standard per-pupil amount based on each board's total enrolment; and
- the Intensive Support Amount (ISA), which is a variable amount based on each board's share of students with very high needs.

The current level of special education funding continues to be protected in 2001-02. As part of the government's commitment to increase board's flexibility to address local priorities, boards have flexibility in how they spend any increase in their special education funding in 2001-02.* Boards may continue to direct additional funding to special education programs and supports.

* A school board's envelope of protected special education funding is the lesser of its special education funding envelope in 2000-01, as calculated per the Student-Focused Funding – Legislative Grants for 2000-01 or its special education funding envelope in 2001-02, as calculated per the Student Focused Funding – Legislative Grants for 2001-02.

ISA Funding Levels

ISA Level 1

Provides funds for specialized equipment for individual students with high needs.

ISA Levels 2 and 3

Provide funds to boards based on the number of students with very high needs, for the provision of specialized programs and services (intensive staff supports in the classroom).

ISA Level 4

Provides funds for educational programs offered to children and youth admitted to care, treatment, or correctional facilities.

Special Incidence Portion (SIP)

Provides funds for staff support for students with extraordinarily high needs to ensure safety in the classroom.

Funding under ISA Level 1 is provided for specialized equipment for individual students and is based on documentation that supports their needs for specialized equipment. This equipment moves with the student if the student moves from one school to another or from one board to another.

Funding for SIP is also provided for individual students, based on documented needs for very intensive staff supports required to ensure the safety of the student or other students.

The SEPPA portion of the Special Education Grant provides each school board with a standard amount of funding based on the total number of students enrolled in the board. SEPPA funding meets the needs of most students who require some special education services.

ISA Levels 2 and 3 provide each school board with funds based on the board's demonstrated incidence of students with very high needs. Boards receive different levels of ISA funding based on the total number of claims they have submitted for students that meet various levels of ISA eligibility criteria.

The needs of special education students are highly variable. Many students have mild or moderate needs that require some extra supports. Some students have very high needs that require intensive staff supports in the classroom every day. Not all students who need intensive staff supports need the same level of support. As a result, school boards must have flexibility to design individual programs for each student with special needs.

For this reason, funding from SEPPA and ISA Level 2 and Level 3 is not allocated to specific students or used on a strict student-by-student basis. SEPPA is provided to each board based on total enrolment. The ISA Level 2 and Level 3 claim and audit process is intended to assess each boards' relative proportion of students with very high needs, and to provide funding in proportion to each boards' incidence of those students. Each board uses its total special education revenue – both SEPPA and ISA Levels 2 and 3 – to meet the needs of all its students with special needs.

Funding for ISA Level 4 is provided to boards to support educational programs provided by boards in correctional, care, and treatment facilities operated by other Ontario government ministries or community agencies. This funding allows boards to provide teachers, teaching assistants, learning materials, and classroom supplies and equipment for children and youth in these facilities.

Ongoing Refinement of the Special Education Grant

We have increased special education funding levels every year since the government introduced student-focused funding.

The ISA approach to special education funding was first implemented in 1998–99. The ministry has continued to refine this approach over the past three years. Interim measures were put in place to support program stability and to avoid adverse impacts on programs that would result from a reduction in special education revenue.

In 1998–99, school boards received funding based on the results of the 1998 claim and audit process or on ministry projections made at the time of the announcement of student-focused funding in 1998, whichever was higher. In 1999–2000, boards received the same level of funding for ISA Level 2 and 3 as they received in 1998–99.

For the 2000–01 school year, to ensure stability of programs, the ministry continues to provide funding for stability based on the funding results of past years. Boards are funded on the basis of their highest result in 1998, 1999, or 2000. This means that many boards are receiving funding in addition to the level generated by eligible claims in 2000.

For the 2001-02 school year, the ministry will continue to provide funding for stability based on boards' final ISA Level 2 and 3 allocation in 2000-01. In addition, funding for student-focused funding has been increased and district school boards have been given the flexibility to use this funding increase to address local priorities. Boards can use their share of this funding to address cost pressures for supports for students with special needs.

The ISA Working Group

In November 2000, the ministry established an ISA working group with a mandate to develop recommendations to support ongoing improvements to ISA funding. The group includes a wide range of provincial associations including representatives from trustees, supervisory officers, business officials, special education administrators, the Minister's Advisory Committee on Special Education, the Ontario Parents Council, and the Provincial Parent Association Advisory Committee on Special Education Advisory Committees (PAAC on SEAC).

In January 2001, the ISA working group recommended a number of integrated strategies to improve ISA funding. The strategies focus on making the process more predictable,

more responsive to need, and less administratively burdensome. The ministry has committed to a multi-year strategy to improve the ISA funding approach based on the recommendations of the ISA working group. A more detailed outline of future refinements to ISA Levels 2 and 3 funding is provided in **Appendix E**.

Funding Directions for 2001–02 and 2002–03

ISA Level 1	<p>Boards will continue to apply for funding for specialized equipment for individual students with high needs. To reduce administrative burden, boards will submit a summary of claims, subject to audit.</p> <p>Beginning in 2001–02, school authorities in children’s hospitals will be able to apply for funding for specialized equipment for individual students. Equipment purchased through this process will be portable to support the transfer of students to district school boards.</p>
ISA Levels 2 and 3	<p>In response to the recommendations of the ISA working group, the ministry will implement a two-year strategy to improve the ISA claim and audit process.</p> <p>Over the summer of 2001, the ministry will be working with its education partners to clarify the ISA eligibility criteria and develop supports to improve the consistency of ISA results. Beginning in the fall of 2001, boards will complete a comprehensive audit over the 2001–02 school year (and part of 2002–03 where necessary), to establish a new baseline of eligible ISA files. In the interim, the ministry will provide stable ISA funding to boards for 2001–02 and will provide an increase to student-focused funding in 2001–02 that boards can use flexibly to address service pressures. The stable funding approach will be reviewed for the 2002–03 school year.</p>
ISA Level 4	<p>Boards will continue to apply for funding following ministry guidelines for educational programs for students admitted to care, treatment, and correctional facilities.</p>
SIP	<p>Boards will continue to apply for SIP funding on behalf of students with extraordinarily high needs.</p>

ISA Level 1 Specialized Equipment Funding

General Information for District School Boards

An ISA Level 1 claim may be put forward by a school board to meet the needs of students who require a total expenditure on specialized equipment in excess of \$800, including freight and taxes, for the school year.

There will be a spring and a fall cycle of ISA Level 1 claims, which will be incorporated into the board's regular budget cycle.

The spring cycle allows boards to purchase equipment and have it in place for the start of the 2001–02 school year. The fall cycle allows boards to meet their in-year equipment needs.

An ISA Level 1 claim may be submitted for any student with special needs enrolled in a board, whether or not a claim is being made for ISA Level 2 or 3 funding.

Boards are required to complete, on a ministry claim form, a summary of all of their ISA Level 1 claims.

Claim documentation, except for claims over \$6000, is not submitted to the district offices but is retained by the boards for ministry audit purposes.

For ISA Level 1 claims exceeding \$6000, the board must seek pre-approval from the Ministry of Education district office to confirm that other less costly options have been explored and are not appropriate. Once approved, boards may include the claim on the ISA Level 1 summary claim form. To complete the equipment claim process for individual claims exceeding \$6000, boards must provide invoices indicating the actual cost to the district office of the Ministry of Education.

ISA Level 1 summary claim forms must be prepared according to ministry instructions and must be verified and signed by the board's supervisory officer responsible for the special education program before being submitted to the district office for processing.

As part of the ISA Level 1 funding process, the ministry provides boards with the summary claim form submitted in the previous claim cycle to allow boards an opportunity to adjust equipment costs reported as estimates to reflect actual costs. The adjusted summary claim form is submitted along with the current cycle's summary claim form for processing. The ministry adjusts boards' ISA Level 1 equipment funding allocation to reflect actual costs, if necessary.

Beginning in 2001-02, boards may submit an early ISA Level 1 claim for students who were attending a provincial or demonstration school and have enrolled in a district school board for the 2001-02 school year. This will ensure that boards have the specialized equipment in place for these students with special needs at the beginning of the school year and will ensure continuity in service delivery.*

To be complete, documentation for each ISA Level 1 claim must be maintained by the board and must include the required assessment and quote or invoice.

Boards are encouraged to use the spring cycle to ensure that equipment is operational and in place for students' first day of school.

The board should ensure that equipment purchased for students whose enrolment is not confirmed is returnable.

* Boards will co-ordinate the application process, including submission deadlines, with the appropriate Ministry of Education district office. Planning for the submission with the district office can begin before the student enrolls in September.

Spring Cycle	Fall Cycle
<p>C May 28, 2001: Boards submit ISA Level 1 claims for students enrolled in the board in 2000–01, for new equipment to be used in the 2001–02 school year.</p> <p>Boards submit adjusted ISA Level 1 summary claim forms from the fall cycle, to report actual costs of equipment.</p> <p>Boards submit completed ISA Level 1 summary claim forms and adjusted summary claim forms to the appropriate district office of the Ministry of Education. For claims in excess of \$6000, full documentation must be submitted with the summary claim form.</p> <p>Boards must submit proof of purchase for equipment purchased in excess of \$6000, that was claimed in the fall cycle, to the appropriate district office.</p> <p>C District offices conduct audits of at least 10 percent of claims reported on ISA Level 1 summary claim form and make necessary adjustments.</p> <p>C June 29, 2001: Boards include estimated ISA Level 1 equipment costs, in their 2001–02 Estimates for student-focused funding.*</p>	<p>C November 15, 2001: Boards submit ISA Level 1 claims for students enrolled in the board in 2001–02, for new equipment to be used in the 2001–02 school year.</p> <p>Boards submit adjusted ISA Level 1 summary claim forms from the spring cycle, to report actual costs of equipment.</p> <p>Boards submit completed ISA Level 1 summary claim forms and adjusted summary claim forms to the appropriate district office of the Ministry of Education. For claims in excess of \$6000, full documentation must be submitted with the summary claim form.</p> <p>Boards must submit proof of purchase for equipment purchased in excess of \$6000, that was claimed in the spring cycle, to the appropriate district office.</p> <p>C District offices conduct audits of at least 10 percent of claims reported on ISA Level 1 summary claim form and make necessary adjustments.</p> <p>C December 15, 2001: Boards include estimated ISA Level 1 equipment costs, in their 2001–02 Revised Estimates for student-focused funding.**</p>

* Subject to confirmation of submission deadlines for Estimates for the 2001–02 student-focused funding cycle.

** Subject to confirmation of submission deadlines for Revised Estimates for the 2001–02 student-focused funding cycle.

General Information for School Authorities in Children's Hospitals

Beginning in 2001–02, school authorities in children's hospitals may apply for funding to purchase, for individual students, specialized equipment that costs in excess of \$800, through a claim process that will be part of their annual budget process.

In preparing claims for specialized equipment funding, school authorities in children's hospitals should include documentation that outlines the full cost of the equipment including an estimate of taxes, installation, and delivery charges. Each claim must include the required assessment and quote or invoice.

School authorities in children's hospitals may only submit a claim, for individual students, for specialized equipment that costs in excess of \$800. There will not be an \$800 deductible for specialized equipment for individual students purchased by school authorities in children's hospitals, since school authorities do not receive the special education funding that district school boards use to pay the deductible.

The Ministry of Education will provide detailed guidelines to school authorities in children's hospitals on the specialized equipment claim process, as part of their budget approval instructions.

What's new under ISA Level 1?

ISA Level 1 claims in the spring of 2001 will not be validated by the ministry. Instead, boards will submit a summary of claims (as introduced in the winter of 2000–01). Boards no longer have to submit the required documentation for ISA Level 1 claims to the ministry, unless the equipment claimed costs in excess of \$6000. Funding will flow to boards as part of the regular board budget cycle.

Beginning in 2001–02, school authorities in children's hospitals will be able to apply for funding to purchase, for individual students, specialized equipment that costs in excess of \$800. The claim process for equipment will be part of their annual budget process. School authorities in children's hospitals will be required to submit all required documentation to the Ministry of Education District office for the claims to be processed. This equipment will be portable.

In 2001-02, a board may submit an early ISA Level 1 claim for students who were attending a provincial or demonstration school but have enrolled in a district school board for the 2001-02 school year.

Equipment Deductible and District School Boards

Equipment costs are cumulative for any given student. The ministry will deduct \$800 from the total amount of ISA Level 1 funding claimed for a student in a board in a given school year.

In preparing claims for ISA Level 1 funding, school boards should include documentation that outlines the full cost of equipment including an estimate of taxes, installation, and delivery charges. The \$800 deduction will be made by the ministry.

The ministry will not deduct \$800 from the cost of each piece of equipment claimed for each board student. For example, if one student requires three pieces of equipment totalling \$7200, the ministry will deduct a total of \$800 once in 2001–02 for that student. If three separate students require \$2400 each for equipment (totalling \$7200), the ministry will deduct a total of \$2400 for the equipment (3 x \$800).

It is expected that boards will use other special education funding to cover the \$800 deducted from the ISA Level 1 claim.

Leasing of Equipment

Some equipment is extremely costly. Boards and school authorities in children's hospitals are encouraged to make leasing arrangements that provide for maintenance and substitute equipment.

When leasing arrangements are made, the **entire cost of the lease** should be claimed in the first year – not as a pro-rated cost over the life of the lease. For example, a three-year lease at \$1000 per year would be claimed as \$3000 in the first year of the lease.

Eligible Specialized Equipment

All equipment claims must be for specialized equipment for individual students for use at the school or school authority.

Examples of such equipment are:

- speech analysers
- FM systems
- print enlargers for students with low vision
- amplification systems

- computer hardware/software
- individually modified desks or work tables
- adjustable desks or computer tables
- braille writers
- symbol or letter voice translators
- insulated booths and study carrels
- communication aids, for example, Boardmaker7, speech synthesizers
- positioning devices for sitting, standing, and lying
- other equipment that is required at school for the personal use of specific students to facilitate an approved course of study

Costs claimed may include the cost of equipment; insurance; warranty agreements; service agreements; and peripherals such as computer cables, batteries, and software required to make the equipment work.

Boards and school authorities in hospitals must ensure that specialized equipment purchased in Ontario meets Canadian safety standards, where applicable.

Radio-frequency equipment, optical aids, electronic devices, and positioning equipment often become damaged, obsolete, or outgrown. Approval for the same or a similar piece of equipment for the same student may be given after three calendar years when the request is accompanied by appropriate documentation.

If more expensive versions of equipment are purchased, there should be an explanatory note to justify the preference, such as compatibility with other components already on-site, or ease of use for a particular student's cognitive or manual abilities.

Boards and school authorities in children's hospitals must be able to show that due care has been taken to minimize costs (for example, protect devices from theft, reduce insurance costs, solicit competitive quotes for service agreements).

Where equipment is shared, the cost should be assigned to one student and the other students sharing it should be noted. An example of equipment that might be shared is a braille printer. If the student who claimed the cost of the equipment moves, the equipment may be left in the school to support the remaining students.

If a student receives equipment as part of an insurance settlement or benefit, the board or school authority in children's hospitals must not make an ISA Level 1 claim, as no costs will have been incurred by the board.

If a cost-sharing arrangement has been made, the board or school authority in a children's hospital may claim its share of the cost if its share exceeds \$800.

It is expected that if an on-site visit were to be made in-year:

- the equipment would be found with the student for whom the cost was claimed,
- the equipment would be found in good repair, and

- the student and/or staff would be able to operate the equipment.

Required Documentation

Each ISA Level 1 claim must be documented by:

1. an assessment on file from an appropriately qualified professional,
2. a copy of the invoice(s) or proof of cost of equipment to be purchased, and
3. a current copy of the student's IEP.

Documentation should include the board's student number of the student assigned the equipment.

The first two requirements are expanded below.

1. An Assessment on File from an Appropriately Qualified Professional

The appropriately qualified professional will vary depending upon the nature of the student's disability and the purpose and function of the equipment. Regardless of who performed the assessment, it should indicate:

- that the particular device is essential in order for the student to benefit from instruction, and
- the disability that the device will help to ameliorate.

a) Braille Devices

When claims are made for braille equipment and/or software, there should be evidence that the claims are made for a student who is blind and that the equipment and/or software are required to ensure that the student can have access to his or her educational program. The vision assessment should be performed by an ophthalmologist; however, an assessment or letter of reference from a Provincial School for the Blind, verifying the need for braille and hence for braille equipment, will also be accepted.

b) Communication Devices

When a communication device (such as a speech synthesizer) is purchased, it will normally be purchased for a student who is nonverbal and/or multi-handicapped and/or autistic and/or developmentally disabled. The assessment on file should make reference to the disability for which the communication device is required and state how this particular device will ensure that the student can have access to his or her educational

program and/or assist the student in communicating with others at school. The assessment may have been done by an augmentative communication therapist, a speech therapist, or another knowledgeable person who serves as a consultant or resource to the board.

Students with some learning disabilities or severe physical disabilities may require other communication aids such as voice-activated software. Boards are expected to meet these needs while attending to cost-efficiency. For example, if a widely available voice-activated package will meet the student's needs, it should be obtained before investing in more expensive, specialty software.

c) FM Systems or Similar Devices

When an FM device is purchased, there should be evidence that it is for a student who is deaf or hard of hearing, and that this particular device is required to ensure that the student can have access to his or her educational program. The hearing assessment should be performed by an audiologist; however, an assessment or letter of reference from a Provincial School for the deaf, verifying the need for the equipment, would also be accepted.

When such devices are being considered for students with central auditory processing needs, a six-month trial period is recommended prior to making a claim.

Clear sound fields may be purchased for:

- students who are assessed as being hard of hearing by an audiologist, or
- students who are assessed by an appropriately qualified professional as requiring a sound field for other purposes.

d) Computer Hardware

Claims may not be made for computer hardware when all students in the class would ordinarily be provided with a computer. However, a claim for specialized equipment for an individual student may be made for computer hardware when the equipment is the most effective way of providing the students with a means of communicating his or her knowledge (for example, when the student has severely limited or nonexistent verbal communication, or a physical disability that makes writing extraordinarily difficult or impossible).

e) Mobility Devices

When a personal mobility or lifting device is purchased, it will usually be for a student with physical or developmental disabilities. The assessment on file should make reference to the disability for which the mobility device is required, and to the fact that this particular device is required to provide personal care for the student while at school. An occupational therapist is usually the qualified person who assesses and recommends specific equipment. In instances where the equipment was purchased with the assistance of the Ministry of Health and Long-Term Care's (MOHLTC) Assistive Devices Program (ADP) for home use, a parent's note indicating that this is the equipment used at home will also suffice, since this purchase would most likely have required a prior assessment by an occupation therapist.

Elevators **do not qualify** as lifts and **will not be approved** for equipment claims. Stair climbers **do not qualify** and **will not be approved** for equipment funding. These devices are used as an alternative to renovating a building for elevators or ramps and, therefore, relate to barrier-free design issues. These devices are not considered personal care aids or devices.

Examples of Eligible Needs

- C A deaf or hard of hearing student who requires an FM amplification system in order to participate in his or her educational program.
- C A student with low vision who needs to have large print materials and requires a device to enlarge print, such as a VisualTek7, Opticon7, or computer software such as WINVISION7, to participate in his or her educational program.
- C A student who is assessed as being legally blind and is a braille user, and requires a braille printer, software to convert text to braille, and a number of other braille-marked learning aids (for example, Tactile and Visual Globe, APH Talking Science Calculator, or Tactile braille Rulers), to participate in his or her educational program.
- C A student who is assessed by an appropriately qualified professional as being unable to communicate verbally due to a severe physical or communication disability, and requires a speech synthesizer for use at school. Although the unit may have been purchased through the Ministry of Health and Long Term Care's Assistive Devices Program for home use, the unit is not portable and, therefore, cannot be taken back and forth from home to school on a regular basis.
- C A student who requires an assistive device in order to facilitate lifting, personal care, or other activities of daily living at school due to a physical or developmental or other disability.

2. A Copy of the Invoice or Proof of Cost

Boards and school authorities in children's hospitals are required to maintain, and school authorities in children's hospitals are required to submit, a file indicating the proof of cost of equipment to be purchased, including a copy of the actual invoice. This documentation should show the student number (or student name/date of birth, when student number is not provided) of the person assigned the equipment.

The board's student number must be associated with the equipment. This permits equipment to be tracked should it move with the student to another board or another school authority.

Portability of Specialized Equipment

Equipment purchased by a district school board with ISA funding is portable and moves with the student from school to school or from board to board. District school boards must use the ISA Status Form (**Appendix B**) to facilitate this process. The student's sending board does not get reimbursed by the ministry for the \$800, although boards may make an agreement to reimburse the \$800 to the sending board. However, the student's receiving board will be responsible for any shipping or handling costs associated with the transfer of equipment.

Equipment purchased previously under the provisions of the ministry's former Personalized, Special Instructional Equipment (PSIE) program may remain the property of the board unless the board opts to transfer the equipment with the student.

Specialized equipment for individual students purchased by school authorities in children's hospitals through the equipment claim process is portable. As with specialized equipment purchased with ISA Level 1 funding in district school boards, specialized equipment purchased by a school authority in a children's hospital will move with the student to another board or another school authority.

School authorities in children's hospitals will use a separate form, to be provided by the Ministry of Education, to facilitate equipment tracking.

Ministry of Health and Long-Term Care Assistive Devices Program

The Ministry of Health and Long-Term Care's (MOHLTC) Assistive Devices Program (ADP) provides partial funding to individuals for some equipment intended **for use primarily in the home**. By its nature, some of this equipment is portable and, therefore, can be used at both home and school. Cost-sharing arrangements are encouraged and may be claimed when the boards' share surpasses \$800 for the student in the school year. Where a duplicate piece of equipment is needed because it is not portable between home and school, the board may submit a claim for the duplicate piece of equipment used at school.

An ISA claim may not be made for the portion of the equipment cost eligible for funding assistance under ADP. For further information about the ADP please contact the MOHLTC - ADP through the blue pages of your local telephone directory.

ISA Level 2 and ISA Level 3

Approach for 2001–02 and 2002–03

Over the spring and summer of 2001, the ministry and its education partners will work to refine the ISA Level 2 and Level 3 eligibility profiles. Starting in the fall of 2001, and ending October 31, 2002, school boards will establish a new baseline of eligible files by completing a comprehensive audit of ISA files.

After a new baseline of eligible files is established, boards will claim only new files each year. The intended effect is to reduce the annual administrative effort required in future years.

While the baseline is being established, boards will receive stable ISA funding in 2001-02 (the final amount of ISA Level 2 and 3 funding allocated in 2000–01, adjusted for portability). Boards will also receive increased funding through enhancements to student-focused funding in 2001-02, which boards can use to address cost pressures for supports for students with special needs. The stable funding approach will be reviewed for the 2002–03 school year.

For a more detailed outline of the future direction of ISA Level 2 and 3 funding, see **Appendix E**.

ISA Level 2 and Level 3 Portability

To help ensure that boards' funding matches their relative share of high needs students, ISA funding is adjusted when a student for whom a claim was filed in the 2000 ISA audit moves between boards. Portability will adjust each board's ISA Level 2 and 3 allocation to reflect the transfer of ISA files among school boards.

To facilitate the portability of ISA funding, the Ministry of Education will assign an ISA number to each student for whom an ISA Level 2 and or Level 3 claim was made in the 2000 audit and to each student for whom a new claim is made.

ISA Numbers

Beginning in the spring of 2000–01, the Ministry of Education will assign numbers for identification purposes to students for whom an ISA claim was submitted in 2000. The ministry will also assign numbers for new files claimed in the comprehensive review beginning in 2001–02.

The ministry will ensure that the assignment of these numbers is done in coordination with the Ontario Education Number (OEN) system of student numbers that is currently being established by the ministry.

To support the portability process for 2001–02, each board will receive a spreadsheet listing students claimed for ISA Level 2 and Level 3 in 2000–01. This list will correspond to the ISA claims list used by boards and the ministry in the 2000 ISA audit, with the addition of ISA numbers for each claim.

To apply for portability funding, each board is required to fill out a form, provided by the ministry, identifying, by ISA number, each student for whom an ISA Level 2 and 3 claim was made in 2000 who came from another board and has enrolled in the board as of October 31, 2001. Boards will have to obtain the ISA number for each of the new students from their sending boards. The Ministry of Education will not provide these numbers.

Boards will submit the completed form, including the ISA numbers, to the ministry.

- For the 2001–02 school year, claims are due November 2001.

The Ministry of Education will adjust boards' final ISA Level 2 and 3 allocations, using the receiving boards' validation rate in 2000, to reflect portability. To give boards an opportunity to identify any errors affecting their allocation, the ministry will provide each board with a portability funding summary, including a list of ISA numbers for incoming and outgoing students, and the portability adjustment to their ISA Level 2 and 3 allocations.

The portability adjustment formula will remain the same as used in the past two school years:

$$[(\text{net gain or loss ISA level 2 students} \times \$12,000) + (\text{net gain or loss of ISA Level 3 students} \times \$27,000)] \times \text{receiving board validation rate in 2000}$$

Portability adjustments will be made to all boards to reflect the portability claims, regardless of whether the affected boards submitted a claim.

The Ministry of Education will issue the portability forms that will be used in the claim process in the spring of 2001.

ISA Level 4

As in past years, guidelines for ISA Level 4 will be issued by the ministry in a separate document for the 2001–02 school year.

Special Incidence Portion (SIP)

Continuing in 2001–02, school boards may apply to their Ministry of Education district office for funding through the Special Incidence Portion (SIP), for students who have extraordinarily high needs related to their disabilities for staff support to ensure the safety of themselves or others in the classroom.

Where approved, the ministry will grant up to a maximum of an additional \$27,000 per student.

Beginning in 2001–02, there will be both a fall and a spring cycle of SIP claims, which will be incorporated as part of the board’s regular budget cycle.

The spring cycle of SIP claims will allow boards to reapply for funding for additional staff supports in 2001–02, for students who received SIP funding in the 2000–01 school year. Boards may also apply for funding for students in 2001-02 for whom additional staff supports were provided after the fall application process in 2000.

The fall cycle of SIP claims will allow boards to apply for funding for additional staff supports for students who have been provided with additional staff supports beginning in 2001-02 (new claims).

Eligibility Criteria for SIP

Safety

School boards may bring forward SIP applications on behalf of students who require more than two full-time staff for the safety of the applicant student or other students. Typically, this additional support will be provided by a teaching or behavioural assistant.

The student may be enrolled in either a self-contained or an integrated/resource withdrawal setting to be eligible for SIP.

Staff Support

SIP is intended to offset incremental staff costs for a student who already has at least two full-time staff providing intensive support according to the formula outlined in the staff support worksheets (**Appendix A**).

Where the total support level is more than 2.0 FTE, an amount of funding calculated under the following formula may be made available to an eligible student up to a maximum of an additional \$27,000 per student.

The following formula determines the level of funding for each approved student.

Total staff support level FTE _____
(determined through staff support worksheet formula at time of application)

(_____ total staff support FTE - 2.0) x \$27,000 = _____

Funding for approved SIP claims may not exceed \$27,000.

For example:

If the total staff support level FTE required to maintain the safety of the student or others in the classroom was 2.5, the formula would be applied as follows:

$$(2.5 - 2.0) \times \$27,000 = \$13,500 \text{ (amount of funding available through SIP)}$$

Please note that in this calculation the board is required to have two full-time (FTE) staff persons **prior to** submitting an application for additional funding for support staff. SIP is intended to cover the cost of intensive staff support beyond 2.0 staff, up to a cost of \$27,000.

What's New in SIP Funding

Beginning in 2001–02, there will be two regular SIP application cycles that will flow funding to boards as part of the regular board budget cycle.

Documentation Required

Each new application for SIP will be reviewed by ministry and board staff.

A SIP claim form (**Appendix C**) must be filled out and submitted to the district office on behalf of the student.

In all cases, the following documents must be updated for the current school year.

1. Individual Education Plan (IEP) with specific learning goals identified.
2. A report card confirming that an IEP has been prepared for all appropriate subjects/courses.
3. Staff Support Worksheet (details provided below).

In addition, the following should be prepared by the board for review.

- A current description and assessment of the behavioural issues of the student that have led the board to submit a SIP claim. Where relevant, a description of the safety risks the student may pose to other classmates or to self should be included.
- A management/instruction plan for behaviour modification. Please note that staff should be under the supervision of a psychologist or psychiatrist for the plan to be considered adequate.
- Cost projections for implementation of the plan.
- A description of interministerial involvement in the overall intervention plans for the student (for example, children's treatment centre contact, other services purchased and in place for the student that are funded by other ministries, transitional plans if the student is at the secondary school level).
- Timetables for the staff assigned to the student.

For students for whom an ISA claim was made in 2000–01, documents gathered in the development of a student's ISA claim (including the appropriate assessments, staff timetables, IEPs, and report cards) should also be brought forward for ministry review. (In 2001–02, most students found eligible for SIP funding will have been claimed under ISA Level 3 in 2000–01.)

Boards may also put forward SIP claims on behalf of the students who were not claimed in 2000–01 but who would otherwise meet the SIP criteria. For students for whom an ISA claim was not made in 2000–01, documents gathered in the development of the student's Identification, Placement, and Review Committee (IPRC), including the appropriate assessments and staff timetables, should also be brought forward at the review meeting.

Steps for All Students Claimed	
District office staff will schedule a review meeting within two weeks of board contact regarding the SIP applications.	
Steps for Renewals in 2001–02 of SIP Claims Approved in 2000–01	Steps for New Claims in 2001–02
Applications made on behalf of students who received SIP funding in 2000-01 will be reviewed by the Ministry of Education district office.	New SIP applications will be reviewed by Special Education Project and district office staff.
May 28, 2001: Boards will submit SIP applications for students enrolled in the board in 2000–01, for support staff for the 2001–02 school year.	November 15, 2001: Boards will submit SIP applications for students enrolled in 2001–02.
District office staff will forward a summary of SIP applications to Special Education Project staff.	School board staff should forward two copies of each SIP application to the district office by courier at least ten days in advance of the review meeting.
June 2001: District office staff will hold a meeting to review SIP applications, following which SIP claims will be approved or rejected and the board notified of the decisions.	District office staff should courier one copy of each SIP application to the Special Education Project staff members who will be participating in the review meeting.
Boards may forward rejected applications to Special Education Project staff for reconsideration.	December 2001: District office staff will hold a meeting with Special Education Project and Education Finance Branch staff to review SIP claims, following which SIP applications will be approved or rejected and the board of notified of the decisions.
June 29, 2001: Boards include estimated additional funding, as per the approved SIP applications, in their 2001–02 Estimates to student-focused funding.*	December 15, 2001: Boards include estimated additional support staff costs, as per the new SIP applications, in their 2001–02 Revised Estimates.**

New SIP applications for the current school year (2000-01) can be made in the spring cycle. These claims will follow the spring cycle timeline and the fall cycle (new claim) instructions.

Renewals that were rejected may be resubmitted, as per the new claim instructions.

* Subject to confirmation of submission deadlines for Estimates for the 2001–02 student-focused funding cycle.

** Subject to confirmation of submission deadlines for Revised Estimates for the 2001–02 student-focused funding cycle.

Boards are reminded that regardless of the outcome of their SIP applications, all special education students should receive the services and supports outlined in their IEPs.

Staff Support Worksheets

As part of each SIP claim, boards are required to complete an accurate Staff Support Worksheet that details the level of support being offered to the student.

Accompanying the Staff Support Worksheet should be a timetable. Timetables will prove useful to board staff in calculating support for the Staff Support Worksheet for each claim and to ministry staff reviewing the SIP claim.

There is a Staff Support Worksheet for each of the following:

- students in integrated or integrated/resource withdrawal programs;
- students in self-contained settings;
- students who are deaf, blind, or deaf-blind in integrated/resource withdrawal; and
- students who are deaf, blind, or deaf-blind in self-contained settings.

Time spent by teaching and behavioural assistants, child and youth workers, and other equivalent classroom assistants can be included on the worksheets, provided that these staff are spending regularly scheduled time with students. Staff counted in the Staff Support Worksheets must be spending at least ten percent of the student's instructional hours during a week with the student, on a regularly scheduled basis, for the entire school year.

The Staff Support Worksheets should not include time spent by professional supports. In most instances, professional supports are provided on a consulting basis over a limited number of sessions with the student, varying in frequency over the year. Only in exceptional circumstances, where the board can document that a student's program includes a significant level of regular interactions (exceeding a total of ten percent of instructional hours during a week) that continue over the school year, can these supports be included in the worksheets.

If small group interaction is part of the student's plan, the time that the student spends with other students can be counted as part of the claimed level of support, as long as the support person is in attendance.

Time spent by special education teachers may also be counted as intensive support for students in self-contained classrooms or resource withdrawal arrangements.

Classroom teacher time can be counted as intensive support only where the teacher is a special education teacher:

- in a self-contained classroom or
- providing resource withdrawal.

Teacher time in a regular classroom is not counted in the calculation of intensive support in integrated settings, because funding for the teacher's salary is generated through the Foundation Grant.

Appendix A: Staff Support Worksheets for Special Incidence Portion(SIP)

Staff Support Worksheet 1: Integrated or Integrated/Resource-Withdrawal Program Setting

Program Setting**

Student Information

Last Name: _____		First Name: _____		School Mident Number: <input type="text"/>
Date of Birth: _____		FTE <input type="text"/>	Panel: Elementary <input type="text"/>	Sex: Male <input type="text"/>
Day	Month	Year	Secondary <input type="text"/>	Female <input type="text"/>
			(0.5 for JK and K) (1 for other grades)	

ISA Claim Status (for information purposes only, not required)

Was an ISA Level 2 or 3 claim submitted for the student in 2000-01?	Yes <input type="text"/>	No <input type="text"/>
If yes, ISA # (assigned by the ministry)	<input type="text"/>	
For which profile was a claim submitted?	Profile #	<input type="text"/>
Which ISA level did the student match?	ISA 2 <input type="text"/>	ISA 3 <input type="text"/>

Integrated or Integrated/Resource-Withdrawal Program Setting

The following information is to be completed based on the program currently provided to this student at the time of application. Treat JK/Kindergarten claims as full-time students for calculation purposes.

Enter FTE of TA specifically dedicated to this student on Line 1*	Line 1	<input type="text"/>
If additional resources are provided to this student in a resource-withdrawal program:		
Enter number of students in the resource-withdrawal program this student attends on Line 2**	Line 2	<input type="text"/>
Enter percentage of time this student spends in the resource-withdrawal program (please state percentage as a decimal: e.g. 25% is 0.25) on Line 3	Line 3	<input type="text"/>
Enter (Line 3/Line2) X 2.5 on Line 4	Line 4	<input type="text"/>
Enter (Line 1 + Line 4) on Line 5	Line 5 TOTAL	<input type="text"/>

(2 Decimals)

* In integrated classes where the TA supports more than one special needs student, pro-rate the share of TA's support for each student (for example, if a TA supports two students equally the FTE for the student claimed on this form would be 0.5). Time spent by both teacher and behavioural assistants, child and youth workers, and other equivalent classroom assistants can be included on the worksheet, provided that those staff are spending regularly scheduled time with students.

**Note: resource withdrawal time can be counted as intensive support only where the teacher is a special education teacher.

Certification

I certify that the information contained in this document is a true reflection of the program provided to the student at the time of application.

Appendix E: Future Direction for ISA Level 2 and 3 Claim Process

In response to the concerns raised by its education partners, the Ministry of Education began consulting with its education partners about ongoing improvements to ISA funding and the claims review process in 2001-02 and future years.

To facilitate this consultation, the ministry established an ISA working group in November 2000. The working group includes representatives of provincial associations of trustees, supervisory officers, senior business officials, the Minister’s Advisory Committee on Special Education, and the Ontario Parents Council. Recently, a member of the Provincial Parent Association Advisory Committee on Special Education Advisory Committees (PAAC on SEAC) was added to the ISA working group.

The ministry has announced a multi-year strategy to improve the ISA funding approach, based on the recommendations of the ISA working group.

Implementation Direction	Explanation
ISA eligibility criteria will be refined and implementation supports will be developed.	Clarified ISA eligibility criteria and implementation supports will be ready for use in the 2001–02 claim process.
Eligible files in 2000 will be used as a base from which to build a comprehensive baseline of files.	<p>To do this, the ministry will add as many files to the baseline as possible, while ensuring appropriate accountability by:</p> <ul style="list-style-type: none"> C“Grandparenting” validated files (files audited and found eligible in 2000). CAdding files claimed in 2000, but not audited, to the baseline, where the board’s validation rate is above a threshold. The board’s prior claims and validation rate will be reviewed and claims added to the “grandparented” baseline, profile by profile (so that a board’s total claimed files for a specific profile will be added to the baseline if the board’s validation rate for that profile was above the threshold validation rate). The validation rate threshold will be established based on a statistically valid model that ensures equitable treatment of boards.

Implementation Direction	Explanation
<p>A comprehensive audit of new files will be completed from September 2001 to October 31, 2002.</p>	<p>In summer 2001, the ministry will release new ISA eligibility criteria and new implementation supports to boards for use in the comprehensive audit (the September 2001 to October 31, 2002 claim and audit process).</p> <p>In August 2001, the ministry will complete intensive training of auditors and board staff for the comprehensive audit.</p> <p>Using the refined ISA eligibility criteria, boards will submit the following files to add to their baseline of eligible files: Cfiles never claimed before, and Cfiles claimed in prior years that were not found eligible in the starting base of eligible files in 2000.</p> <p>All boards will complete this claim process by October 31, 2002. ISA funding for the 2003–04 school year will be “live” for all boards.</p> <p>This will establish a comprehensive new baseline of eligible files for all boards.</p> <p>This in turn will allow the ministry to adjust the ISA allocation in 2003–04 to reflect a true base of incidence.</p>
<p>Boards will be able to resubmit claims from 2000.</p>	<p>Boards may resubmit a claim if: Cthe claim was audited in 2000 and rejected, or Cthe claim was submitted in 2000 as an ISA 3 claim, audited, and accepted as an ISA 2 claim.</p>
<p>Provide stable funding over 2001–02.</p>	<p>The ministry will provide stable ISA funding to boards for 2001–02 and will provide an increase to student-focused funding in 2001–02 that boards can use flexibility to address service pressures.</p> <p>The ministry will review the stable funding approach for 2002–03, in consultation with boards and associations.</p>

Implementation Direction	Explanation
<p>The allocation approach for all boards in 2003–04 will be adjusted to reflect a true base of incidence of eligible files.</p>	<p>After completion of the new baseline, the ministry will consult with boards and provincial associations about the impact of funding boards based on their demonstrated level of ISA-eligible files. The ministry will review this funding impact and develop options, if necessary, addressing the whole allocation for special education (including SEPPA).</p> <p>As part of the announcement of funding for 2003-04 (in spring 2003), “live” ISA funding results for boards for 2003–04 will be confirmed, based on the amount of funding generated by their new baseline.</p>
<p>After 2003–04, only new files will be audited each year.</p>	<p>Subsequent files in future years will be added for new eligible files only, net of eligible files that leave each board.</p> <p>“New files” are any files not in the baseline of eligible files. Examples: files that have never been claimed or files that have been found ineligible in the past but could be re-submitted due to a change in a student’s characteristics.</p>

Appendix F: Results of the 2000 Claim and Audit Process

Purpose

This paper analyses data collected from submissions by school boards for Intensive Support Amount (ISA) funding for the 2000–01 school year.

The information in this paper will:

- support the ministry’s consideration of ongoing improvements to funding for special education in future years, and
- help school boards assess their particular ISA results in the context of provincial trends.

ISA Submissions in 2000

As in 1998 and 1999, boards submitted files for ISA funding in 2000. Each file included data indicating:

- the needs relevant to the ISA eligibility of the student for whom a claim was being submitted;
- whether the file was claimed in the 1999–2000 ISA process;
- the intensive staff supports the board provided for the student during the 1999–2000 school year; and
- the grade, age, and sex of the student.

Eligibility was determined using a set of profiles for different exceptionalities. These profiles were based on the recommendations of the Expert Panel for the refinement of ISA eligibility criteria (which reported in December 1998). Files included information about the extent to which the student met a specific profile.

As in past years, boards’ submissions were audited by external validators with special education qualifications, under contract to the ministry for this purpose. **Attachment 1** outlines the ISA claim process.

As part of the ongoing refinement of the Special Education Grant, the ministry expanded validator training for the ISA claim process in 2000 to ensure greater consistency in audit practices and to ensure inter-rater reliability.

The audit took place in May and June 2000 and the ministry received claim results in June and July 2000. Analysis of claim data and determination of funding results were undertaken in the summer and funding results were released to boards in August.

The analysis of results in this paper includes comparisons of three years of ISA audit and review data – 1998 (the first year of the Special Education Grant), 1999, and 2000.

Funding for ISA in 2000–01 is based on school boards' results over three years. The allocation method for the 2000–01 school year is explained in **Attachment 2** of this paper.

Toronto District School Board

This paper sets out results for all school boards **except** the Toronto District School Board (TDSB). The TDSB provided only a partial submission of claims for 2000–01. Use of this partial information as submitted would distort comparisons with prior years' results.

Because of the size of the student population in the TDSB, the elimination of this partial data from TDSB would also significantly distort reporting of results for 2000.

To allow comparability of results, this paper adopts a number of approaches with respect to the TDSB data.

- For demographic data, including age, sex, and staff support weight data, the TDSB information from the 2000–01 claim submission is used.
- For aggregate nondemographic data, including claims and eligible files, the average results of all other boards are substituted for the TDSB results.
- In data about the number of boards in a given category, TDSB is omitted.

Definitions

For clarity, it is important to note distinctions among some specific terms.

ISA claims are submissions of specific students' files that school boards put forward for review of eligibility for ISA funding.

Validated ISA files are files that were claimed by boards and audited by the ministry's validators and found to meet eligibility criteria for ISA funding.

Eligible ISA files are the board's files that were determined to be eligible for ISA funding. In most boards, ministry validators audited a sample of ISA claims. The approval rate of the validated ISA files was applied to the total number of ISA claims, to determine the total number of eligible files.

Except where noted otherwise, eligible ISA files for ISA Level 2 include files where the school board submitted a file as matching ISA Level 3 criteria and the validators determined that the file met ISA Level 2 criteria. A file claimed as a Level 3 but validated as a Level 2 is called an *adjusted ISA Level 2 file*.

Results in 2000

Distribution of ISA Claims

The proportion of student enrolment that school boards put forward as ISA claims has increased from year to year.

	1998	1999	2000
Number of claims	28,726	29,886	31,615
Claims as a percentage of enrolment	1.47%	1.52%	1.60%

	# of boards*
Boards that put forward more claims in 2000 than in 1999	36
Boards that put forward fewer claims in 2000 than in 1999	35

* Excludes Toronto DSB

There was variability concerning the *extent* to which boards put forward more or fewer files. Some boards put forward many more or many fewer files; other boards made slight changes.

Most boards that would have received less funding through the 2000-01 audit than through the 1999–2000 audit process also claimed fewer files relative to enrolment, on average, than boards that received more funding in 2000–01.

The proportion of student enrolment that meets ISA eligibility criteria has been consistent.

	1998**	1999	2000
Number of eligible claims	24,919	22,487	23,126
Eligible claims as a percentage of enrolment	1.28%	1.15%	1.17%

	1998**	1999	2000
Approval Rates (number of eligible claims/number of claims)	86.5%	75.2%	73.1%

** 1998 eligible files include conditional approvals

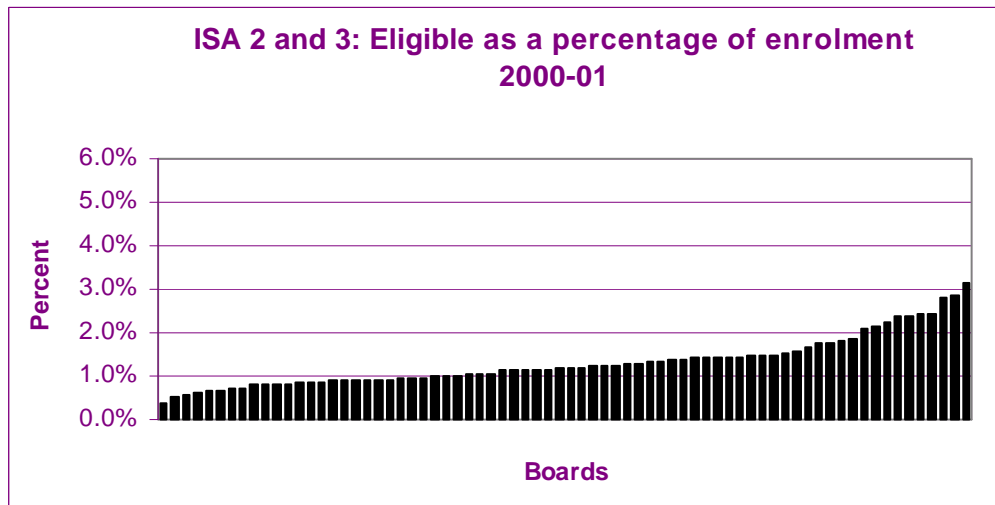

Strict comparisons between 1998 and the other years is not possible because the 1998 approval rates included conditional approvals. In 1998, because the ISA process was new, validators gave conditional approval to incomplete files where available documentation supported eligibility. Conditional approvals were not granted in 1999 or 2000.

Thirty-eight boards had lower approval rates year over year (a lower rate in 1999 than in 1998, and a lower rate in 2000 than in 1999).

There continues to be a significant variance in the proportion of ISA eligible files in different boards.

ISA 2	1998	1999	2000
Highest proportion of eligible files, as a percentage of board's enrolment	5.11%	3.69%	1.94%
Lowest proportion of eligible files, as a percentage of board's enrolment	0.12%	0.18%	0.18%

ISA 3	1998	1999	2000
Highest proportion of eligible files, as a percentage of board's enrolment	2.65%	2.11%	1.54%
Lowest proportion of eligible files, as a percentage of board's enrolment	0.18%	0.19%	0.17%

As in each of the two previous cycles of ISA claims and audit, the results in 2000 continue to show that boards have different incidences of files that meet ISA eligibility criteria. Since ISA funding is designed to meet the cost of providing supports to students with very high needs, this means that boards have varying costs for special education programs that are not strictly proportional to total enrolment.

In 2000, the range of variability narrowed significantly. This “flatter” distribution is because a few boards with extremely high proportions of eligible students showed lower results. Once again, this result is likely due to greater consistency in the auditing of files.

In 2000, a higher proportion of claims was found eligible at the ISA Level 2 than in previous years.

	1998	1999	2000
Number of eligible ISA 2 claims	11,286	11,724	14,466
Number of eligible ISA 3 claims	13,574	10,763	8,660

	1998	1999	2000
Percentage of eligible ISA claims that are ISA 2	45.4%	52.1%	62.6%
Percentage of eligible ISA claims that are ISA 3	54.6%	47.9%	37.4%

This result is due in part to a change in the proportion of ISA Level 2 and 3 claims submitted by boards. In 1999, 52 percent of claims were submitted as ISA 2. In 2000, this proportion increased: 60 percent of claims were submitted as ISA Level 2.

This result is also due to implementation of eligibility criteria. In 1999, some ISA validators recorded ISA Level 3 claims as eligible for ISA Level 2 if they met only ISA Level 2 criteria, but this practice was not followed consistently. For the 2000–01 claim process, validators were explicitly directed to move claims to the ISA Level 2 if they met only ISA Level 2 criteria. This significantly increased the number of adjusted claims.

There is variability among boards in the extent to which ISA Level 3 claims were adjusted to ISA Level 2. The highest proportion of adjusted claims is 57.1 percent (adjusted ISA 3 audited claims/ISA 3 audited claims); the lowest proportion of adjusted claims is 1.8 percent. Almost all boards (70) had adjusted claims.

	1999	2000
Number of ISA 3 claims eligible for ISA 2	226	938
Percentage of ISA 3 claims eligible for ISA 2	5.9%	19.2%

There is a wide variance in the distribution of students among different eligibility profiles. This pattern is consistent with results from previous years

ISA Level 2 - Eligible files as percentage of Enrolment		
1.2	Behaviour	10.8%
2.2	Deaf/hard of hearing	2.6%
3.2	Learning/language	10.2%
4.2	Autism/PDD	6.1%
7.2	Developmental/intellectual	14.0%
8.2	Blind/low vision	0.3%
9.2	Physical/medical	3.0%
10.2	Multiple exceptionality	5.6%

ISA 3 - percentage of files validated in 2000		
1.3	Behaviour	6.4%
2.3	Deaf/hard of hearing	2.8%
3.3	Learning/language	1.6%
4.3	Autism/PDD	6.0%
7.3	Developmental/intellectual	8.1%
8.3	Blind/low vision	1.2%
9.3	Physical/medical	6.0%
10.3	Multiple exceptionality	15.3%

Strict comparison of this data with previous years' data is not possible due to a change in the sampling methodology used in 2000. The file samples taken in 2000 were stratified in large boards to ensure a representative number of claims from each profile. Previous years' samples were not stratified.

More boys than girls meet ISA eligibility criteria.

The above graphs show the sex distribution of validated students (files audited and validated).

- 71 percent of validated claims were submitted on behalf of boys.
- 74 percent of validated ISA Level 2 claims were submitted on behalf of boys.
- 67 percent of validated ISA Level 3 claims were submitted on behalf of boys.

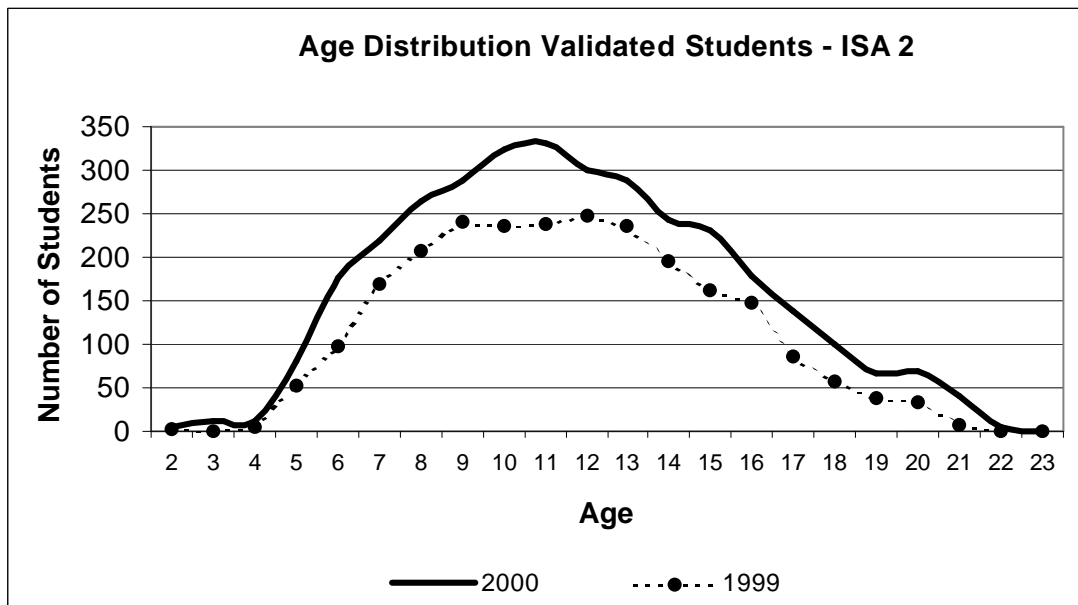

In every profile, for both ISA Level 2 and 3, more files are submitted on behalf of boys than on behalf of girls. This differential is smallest for profile 2.3, deaf/hard of hearing, and greatest for profiles 1.2, behaviour, and 3.3, learning/language disabilities.

These results are consistent with results from 1999.

In 2000, on average, the students for whom ISA Level 2 claims are submitted and the students for whom ISA Level 3 claims are submitted are the same age.

	1999	2000
Average age of students for whom an ISA Level 2 claim was submitted and found eligible	11.57	11.71
Average age of students for whom an ISA Level 3 claim was submitted and found eligible	11.38	11.72

The graphs below show the age distribution of validated files (files audited and found eligible). The total number of students is higher in 2000 because the total number of files audited and validated was greater in 2000. However, the distribution of students by age for ISA Level 2 over the two years is similar.

The key pattern to note is that, in both years, the distribution of ISA Level 3 files shows a slightly higher proportion of younger students.

In 2000–01, the number of ISA Level 2 students peaks at age 11. In 2000–01, the number of ISA Level 3 students peaks at age 8.

Staff Supports

As part of the claim process, boards submitted information about the level of intensive staff support provided to claimed students in the classroom. This information was reported as a *staff support weight (SSW)*.

- A SSW captures information about incremental supports from teaching assistants, special education teachers, and other non-teaching staff providing frequent and regular supports in the classroom.
- As a result, a SSW also represents levels of incremental expenditure for staff supports in the classroom.
- A SSW of 1.0 is equivalent to one full-time teaching assistant, or 40 percent of a special education teacher, dedicated to student for whom an ISA claim was submitted.

SSW data indicates a close match between current ISA Level 2 and 3 funding levels and the cost of supports provided to students.

There is a small shortfall in ISA Level 2 funding when compared to staff supports provided. This is balanced by over-funding of ISA Level 3 relative to staff supports provided.

Students for whom ISA claims are validated and found eligible are receiving significant levels of staff support.

Average SSW for all validated files in 2000 (total ISA)	0.71
---	------

This finding confirms the importance of providing funding to respond to the needs of students who require intensive staff support. The average SSW of 0.71 is equivalent to an estimated \$19,170 for per-student incremental costs of special education teachers and non-teaching staff in the classroom.

Staff supports for eligible ISA Level 2 files are lower than for eligible ISA Level 3 files.

	ISA 2	ISA 3
Average SSW (validated files in 2000)	0.57	0.86

This finding confirms the validity of using two levels of ISA funding. On average, students meeting ISA Level 2 criteria are receiving less support than students meeting ISA Level 3 students. Overall, the SSW reflects boards' decisions about levels of support required,* and thus the level of students' needs.

There is significant variability in staff support levels for different profiles.

Average SSW by profile (validated files in 2000)	ISA 2	ISA 3	Total
1. Behaviour	0.52	0.73	0.60
2. Deaf/hard of hearing	0.82	0.92	0.87
3. Learning/language	0.45	0.74	0.49
4. Autism/PDD	0.66	0.86	0.76
7. Developmental/intellectual	0.56	0.72	0.62
8. Blind/low vision	1.15	1.76	1.65
9. Physical/medical	0.68	0.86	0.83
10. Multiple exceptionalities	0.64	0.91	0.84

This finding suggests strongly that different exceptionalities require, on average, different levels of support.

Overall, eligible ISA files have higher staff supports than rejected files.

This finding reflects in part the eligibility requirement of a threshold for intensive staff supports for some profiles. For example, claims made under profile 2.3 (deaf/hard-of-hearing) and under profile 8.3 (blind/low vision) must meet an eligibility requirement for intensive staff supports.

These findings confirm that ISA eligibility profiles identify students who require intensive staff supports in the classroom, and that ISA funding is linked to a board's proportion of students with high needs who require costly supports.

Even though eligible claims have higher SSW than rejected claims, the data provided by boards confirms that students who do not meet ISA eligibility criteria are also receiving intensive supports.

The Special Education Grant is designed with the recognition that most students with special needs do not require intensive staff supports. The ISA process is intended to

* It should be noted that some profiles have eligibility criteria that include a minimum level of staff support: students with blindness and hearing impairments, students with physical or medical conditions, and students with multiple exceptionalities.

provide funding for staff supports in response to boards' incidence of students with very high needs. Some students that do not meet ISA eligibility criteria also have high needs, but funding for special education gives boards the flexibility they need to support all students.

- The Special Education Per Pupil Amount (SEPPA) of the Special Education Grant is intended to provide flexible funding to allow boards to provide programs and supports for all their special education students.
- Changes to ISA funding for the 2000–01 school year also recognize the need to provide flexibility. Boards receive ISA funding as part of their total special education allocation and can use this funding to adjust programs and supports for all students with high needs.

The costs of the intensive staff support component for students in self-contained programs are lower than costs for students integrated into regular classrooms.

This finding indicates that, on average, the incremental costs of staff supports in self-contained programs are lower than in integrated programs in regular classrooms.

A caution about this finding, however, should be noted. These relative SSWs may not reflect the relative costs of the program types.

- The SSWs quantify only the incremental costs of teachers and non teaching staff supports in the classroom.
- There are other costs associated with self-contained programs, notably higher transportation costs.

It is not possible at this time to provide a comprehensive evaluation of the relative costs of these alternative program types.

Summary Tables:

The following tables showing board-by-board ISA results for three years (except where noted):

Attachment 1: Method of ISA Audit and Analysis

Refinements in 2000

In 2000, refinements were made to the ISA audit implementation process to improve consistency:

- The ministry expanded training for ISA validators and introduced inter-rater reliability testing.
- The ministry improved its sampling methods and expanded the sample size, to ensure that results were more consistent.
- In 2000, the ministry audited a higher number of files to improve the statistical validity of results. In 1999, validators audited 7,420 files (25 percent of claims). In 2000, validators audited 9,768 files (31 percent of claims).
- The ministry also introduced more detailed requirements for documentation to support claims (notably concerning assessments).

These changes resulted in a more rigorous and consistent evaluation of ISA claims.

Audit Process in 2000

The ministry published the *Resource Manual for the Special Education Grant Intensive Support Amount: Guidelines for School Boards 2000–2001*. This resource manual was published in early March 2000, together with the grant regulations for school board funding in the 2000–01 school year.

The resource manual:

- explained the intent and process of the ministry’s audit of ISA eligibility criteria;
- set out eligibility criteria, including a prerequisite checklist and profiles for specific exceptionalities; and
- set out a method for calculating the level of intensive staff supports.

Ministry staff travelled throughout the province in March and April, providing training to special education staff of each school board concerning the intent, process, and requirements of the audit.

In May and June, school boards used the prerequisite checklist and eligibility profiles (as published in the resource manual) to determine which students with special needs they would submit a claim for under the refined criteria. Boards could claim students only if they were enrolled in the 1999–2000 school year.

For each file submitted, boards were required to provide documentation concerning the match of the student to a specific profile. By matching students to these profiles, boards identified the students' exceptionalities and level of need (ISA Level 2 or ISA Level 3).

Using the approved ministry form, boards also indicated, for each student claimed, the level of intensive staff support received by the student in the 1999–2000 school year.

ISA validators – special education experts under contract to the ministry – audited each school board's claims.

Boards put forward claims for 31,615 students. It was not feasible or necessary to audit each file. The validators audited sufficient numbers of each board's claims to allow statistically valid conclusions. In total, 9,768 files (31 percent of the total) were audited.

In small boards, the validators audited each file: in six boards (8 percent of boards), all files were audited.

In larger boards, the validators audited a statistically valid sample of files.

Methods Used to Determine Results

To develop the analysis of results of the audit, the ministry had to:

- project results from the samples of submissions audited by the validators to the entire population of ISA files submitted by school boards, and
- adjust claims for files that would have been found eligible at a lower ISA level.

Projecting results from samples to the entire population:

In many boards, the ministry had validated data concerning only a sample of files claimed (the sample that the validators audited).

To support conclusions about the whole population of ISA files, the ministry had to use information from the audited samples to predict results for all the files submitted.

To reach conclusions about the number of eligible students, the ministry used validation rates of the audit samples for each board.

Adjusting claims for students eligible for a lower level of ISA:

In some instances, boards claimed that files met ISA Level 3 criteria, but validators noted that although they did not meet Level 3 criteria, these files would have met the ISA Level 2 criteria.

Validators were authorized to approve these files as ISA Level 2. This direction affected the number of eligible files.

Attachment 2: 2000–01 Funding Approach

The ministry has adapted its ISA funding approach for the 2000–01 school year to achieve two key objectives:

- to protect and improve programs and supports for students with special needs; and
- to ensure that funding is responsive to each board's varying share of students with very high needs.

In 1998–99, school boards received funding based on the results of the 1998 claim and audit process or on ministry projections made at the time of the announcement of student-focused funding in 1998, whichever was higher. In 1999–2000, boards received the same level of funding for ISA Levels 2 and 3 as they received in 1998–99.

For the 2000–01 school year, to ensure stability of programs, the ministry continues to provide funding for stability based on the funding results of past years. Boards are funded on the basis of their highest result in 1998, 1999, or 2000. This means that many boards are receiving funding in addition to the level generated by eligible claims in 2000.

This approach was implemented in all but five boards. These five boards had higher results in 1999 than in 2000. However, funding on the full amount of their 1999 results would have meant funding these boards in excess of 100 percent approval of their claims in 2000.

As these boards showed a higher level of need in 1999 than in 2000, as with other boards, the ministry recognized the higher level of need – but only up to the level claimed in 2000.

These five boards were funded as if their claims in 2000 had been validated at 100 percent. They have higher funding amounts in 2000–01 than they had in 1999–2000.

This 2000-01 approach to funding will generate approximately \$47 million in additional ISA support for 2000–01.

ISA Level 2 and 3 Actual Funding
